*Type of configuration is reflected on the label package with fittings

Before the assembly:

Check the appearance and integrity of the parts in the packaging! Claims for damage can only be accepted for products WITHOUT traces of assembly.

Keep the packaging and instructions until the assembly is completed!

Check the number parts of accessories on the list.The manufacturer reserves the right to make constructive changes in the product, replace fittings and hardware with similar ones that do not deteriorate the appearance and do not affect the functional properties of the product.

In case of a shortage of breakdown, circle the number of the corresponding part and inform the store foe its replacement .

Observe the assembly procedure given in these instructions! Failure to comply with the assembly and operating instructions will invalidate the manufacturer's warranty.

Choose a flat floor area for the bed! If the floor is curved, there may be If the floor is distorted, the bed transformation mechanism may not work properly and the shape of the product may be distorted.

The bed must be assembled by two people. Move all parts gently, without jerking, stack them firmly and avoid dropping or bumping them!

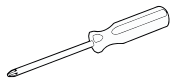

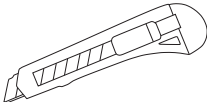

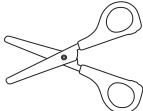

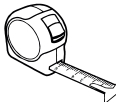

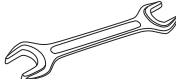

Move furniture and its parts only by lifting them slightly. This will prevent deformation and breakage.

Be sure to lubricate the lifting mechanism during assembly according to the instructions! This will prevent premature cracking. Repeat lubrication, retighten loose bolts and nuts at least every six months.

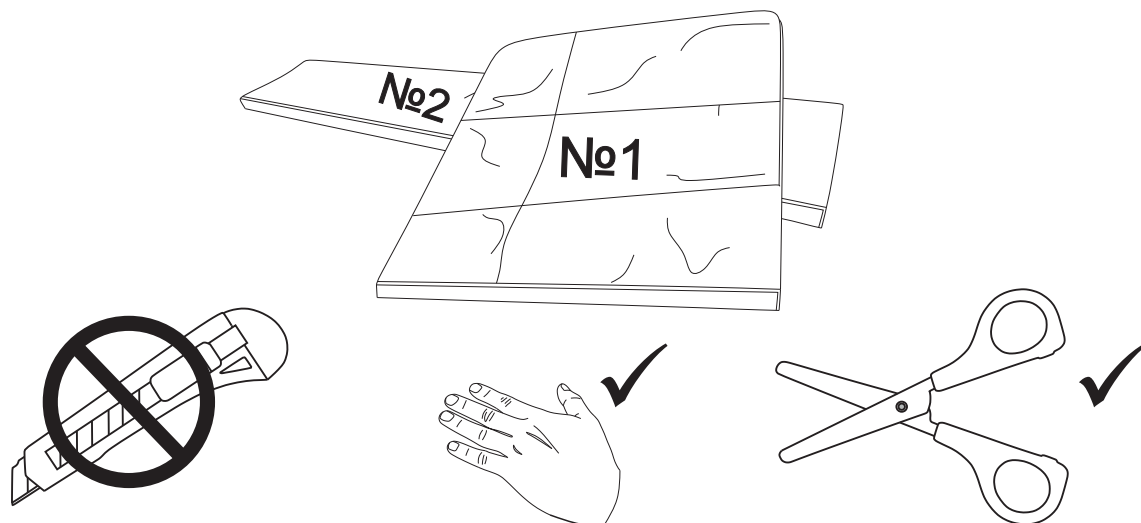

New furniture may give off the natural odour of the materials from which it is made.

The odour may persist for up to three weeks after assembly. To reduce the intensity of the odour it is recommended to vacuum the product and ventilate the room. These actions should be repeated 3-4 times a day.

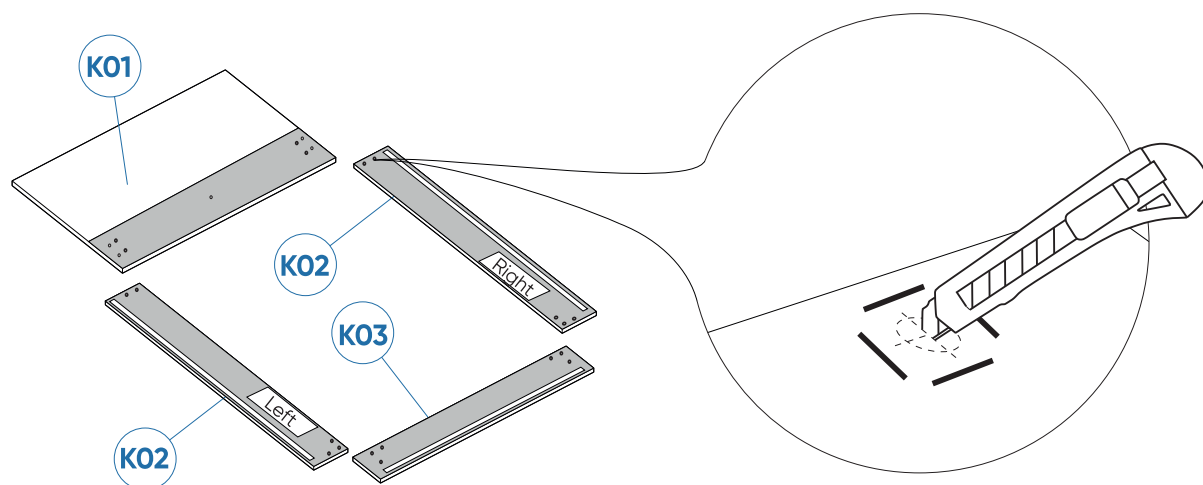

To assemble you will need:

				
Phillips screwdriver	Box cutter	Scissors	Tape measure	Open-end wrench N°13
